ABSTRACT

A set of posters presenting 34 bulletin board ideas highlights allied health occupations. Posters focus on employment qualifications and opportunities, education for this field, and career ideals and advantages. Illustrations are accompanied by suggestions regarding color schemes, textured materials, and objects that may be useful in adapting the ideas provided. (KM)

## INTRODUCTION

Colorful and creative bulletin boards add much to the classroom/laboratory learning environment. As a teaching/learning activity, development of a bulletin board theme and finished product by students and teachers can convey important ideas and information to recognize and promote health occupations education and health careers.

The ideas in this booklet are designed to give health occupations education teachers and students a springboard to creative, eyecatching and informative bulletin boards.

The committee suggests that you use colorful, textural materials such as fabrics, papers, and packing materials which will add depth and variety to these effective yet simple designs. The use of bold, bright colors will attract attention and found materials or inexpensive retail items will give a feeling of realism. Use these basic shapes and ideas as background for as much detail and creativeness as your time and budget will allow.
